Mediterranean Modern

Holt Design House | Los Gatos, CA
Winter 2024 - In Progress

Blending timeless elegance with contemporary comfort, this full-home transformation reinterprets Mediterranean design through a modern lens. I've contributed to this project by assisting with material selections, developing client presentations, conducting in-depth design research, and refining floor and furniture plans. Additionally, I've supported the design vision through detailed 3D modeling, helping to bring the concept to life.

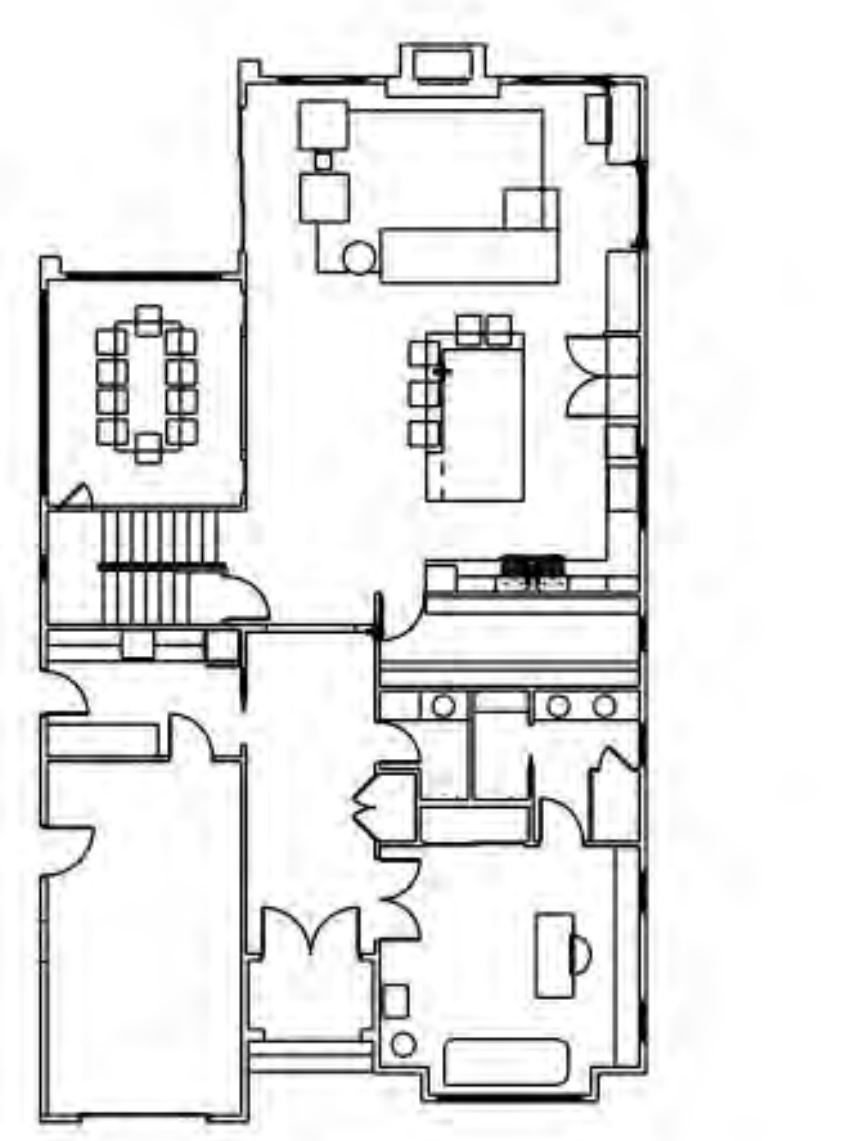

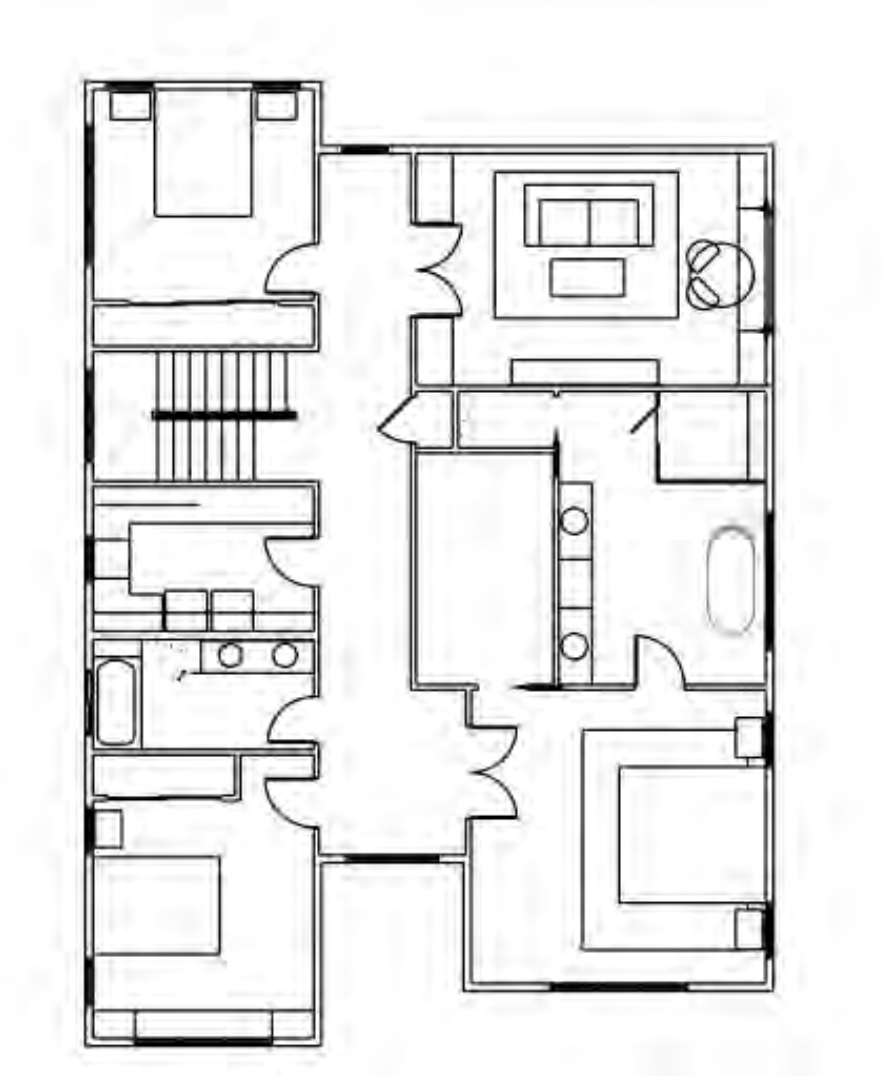

Contemporary California New Construction

Holt Design House | Los Gatos, CA
Fall 2024 - In Progress

Modern elegance meets functional design in this custom new build. The project centers around a harmonious blend of natural textures, clean lines, and a warm, modern aesthetic.

My contributions to this project include assisting with floor plans, elevations, furniture layouts, client presentation and custom millwork designs. From material selection to 3D visualization, my role focused on supporting the head designer in creating a cohesive and sophisticated design that fit the family's needs.

Industrial Juxtaposition

Personal Work | Nashville, TN

Winter 2024

Nestled in the heart of an artsy pocket of Nashville, this industrial condo was reimagined into a moody, comfortable, and chic retreat. I curated a rich, atmospheric palette with carefully selected paint colors, lighting, hardware, and furnishings to balance warmth with the condo's raw architectural elements. The result is a layered and inviting space where industrial charm meets refined elegance, creating a home that feels both stylish and deeply personal.

Urban Eclectic

Conceptual Design | Nashville, TN
Summer 2024

This conceptual design envisions a refined yet effortlessly cool bachelorette pad in the heart of Nashville. Blending urban modernity with warm, inviting textures, the space juxtaposes timeless antiques with sleek contemporary finishes. The result is a dynamic yet livable interior—where soft femininity meets bold architectural elements.

From initial mood boards to fully rendered visuals, this project reflects my personal design sensibility: a balance of contrast, depth, and personality-driven spaces. Though purely theoretical, it represents my approach to crafting interiors that feel both curated and comfortable.

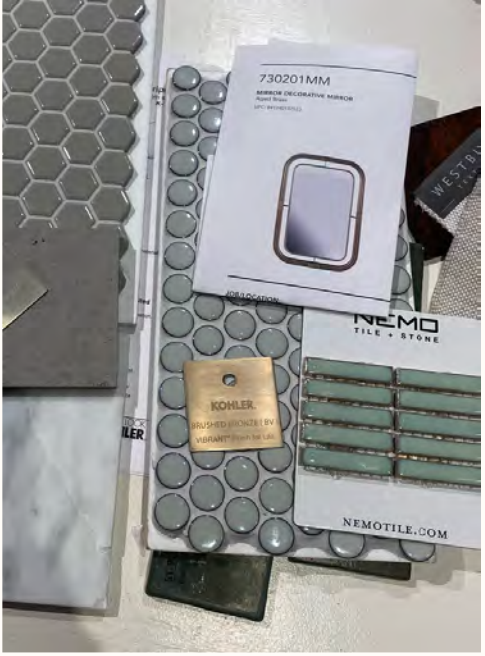

Basement Powder Bath

Modern Remains Internship | Nashville, TN
Summer 2022

For this refined yet functional basement powder bath, I curated tile, lighting, mirror, and pre-fabricated vanity selections, ensuring a cohesive and stylish design. My work also included preparing a detailed client presentation and creating precise AutoCAD elevations to communicate the design intent effectively. This project was an exercise in balancing aesthetics with practicality, delivering a polished and thoughtfully designed space.

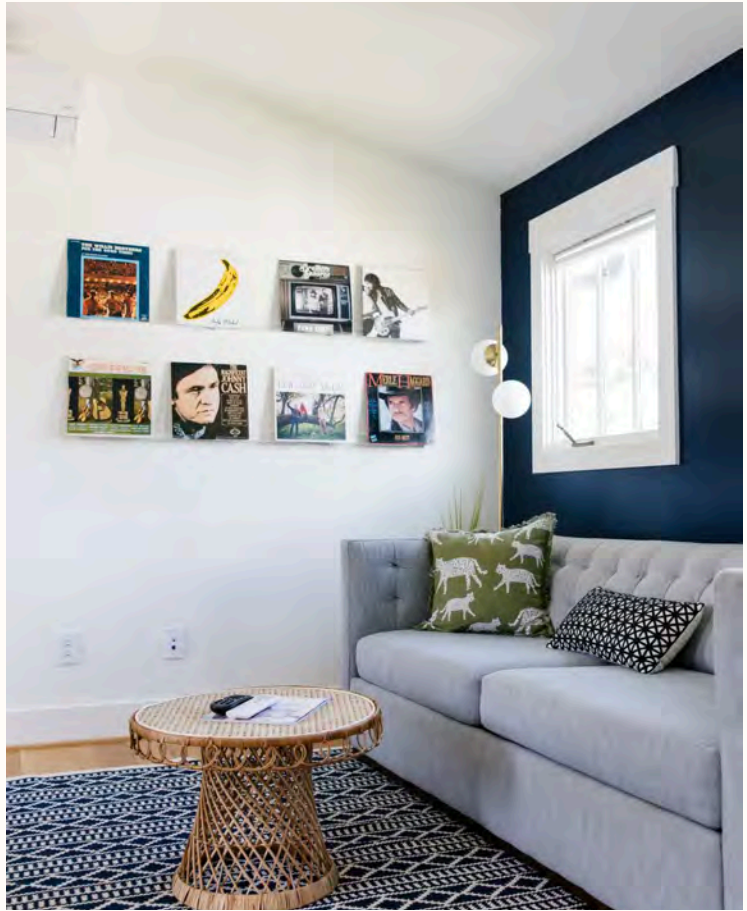

(Professional photography currently unavailable for press consideration.)

ADU AirBNB

Personal Work | Nashville, TN
Summer 2022

I was brought in to transform a DADU, previously a recording studio, into a short-term rental property. My goal was to maintain the space's light and airy feel, while incorporating vibrant accents and accessories. By sprinkling quirky and personalized touches, I infused a sense of playfulness into the otherwise clean and minimalist environment. I handled space planning, FF&E procurement, and material selections.

Materials Selections

Brownhouse Design | Los Altos, CA
2023 - 2024

In my roles as a Design Assistant and later as a Design Coordinator, I played a key role in client relations, supporting both the Principal and Senior Designer throughout high-end residential projects. I regularly attended client meetings, assisted with presentations, and prepared both physical material boards and digital presentations to effectively communicate design concepts.

My responsibilities also extended to technical design support, where I collaborated with the architectural team to develop interior elevations in CAD. Additionally, I utilized SketchUp to produce 3D renderings, helping to bring design visions to life.

Miscellaneous Work

Conceptual | 3D Visualization
2023 - 2024

Design is not just my profession—it's my creative outlet. This collection of conceptual projects represents explorations in form, color, and spatial storytelling, created purely for the joy of designing. Each piece showcases my ability to develop unique interiors, experiment with materiality, and communicate ideas through high-quality 3D renderings.

From bold, eclectic living spaces to modern, moody lounges, these designs highlight my versatility and deep appreciation for both classic and contemporary aesthetics. While theoretical, they reflect my instinct for composition, texture, and ambiance—key elements that shape my approach to real-world projects.
